

PRACTICE SAFE PATIENT VISITS

PRE-APPOINTMENT SCREENING

Our process to screen patients for appointments will determine if a telehealth visit or an in-office emergency appointment is needed.

TELEHEALTH APPOINTMENTS

We now offer telehealth appointments. Access healthcare right from the safety of your own home.

SCHEDULING SMARTER

We've adjusted appointment schedules to keep you and our staff safe. By limiting the number of people arriving for appointments, we will have plenty of time to clean in between patients.

SOCIAL DISTANCING

There will be no patients allowed in our waiting area, we require you to wait outside the in your vehicle prior to your appointment. Please call us when you arrive and we will call you back when we're ready to see you.

SYMPTOM SCREENING

We're now requiring health checks for our team and patients. This means daily temperature checks for everyone coming into our office. We will also ask a few standard questions related to your health and possible exposure to the virus.

CLEANING, SANITIZING, STERILIZATION

We have always been committed to the highest safety standards, our daily deep cleaning procedures include sanitizing & sterilization of chairs, instruments, surfaces, and common areas between patient visits.
